## Objective:

Motivated and versatile MSc Data Science student with strong technical skills in Python, SQL, and data analysis, combined with hands-on experience in full stack web development using HTML, CSS, JavaScript, React, Node.js, and MongoDB. Eager to contribute to innovative, data-driven applications and end-to-end web solutions in a collaborative environment. Seeking an entry-level role where I can apply my analytical mindset and development skills to solve real-world problems and grow as a well-rounded technology professional.

---

## Education :

**Master of Science (MSc)**
Symbiosis School For Online and Digital Learning
2024 – 2026 (Expected)

**Bachelor of Computer Applications (BCA)**
D.P Vipra Vishwa Vidyalay Bilaspur
CGPA – 7.62 | 2021 – 2023

---

## Technical Skills :

### Web Development -

- **Front-end —** HTML, CSS, JavaScript,PHP, React.js, Tailwind CSS, Bootstrap
- **Back-end —** Node.js, Express.js
- **Database —** MongoDB, SQL, Oracle
- **Hosting & Services —** Firebase (Basic)

### Data Analytics & Visualization-

- Python (Data Analysis)
- NumPy, Pandas, Matplotlib (Basics)
- Microsoft Power BI (Data Visualization)

## AI Tools & Technologies-

- Practical Use of AI Assistants**:** ChatGPT, Gemini (Google), Grok AI

## Additional Technical Skills-

- REST APIs
- Version Control: Git & GitHub
- Basic Knowledge of Deployment & Integration

## Soft Skills -

- Communication
- Team Collaboration
- Time Management
- Adaptability
- Critical Thinking

---

## Projects-

**Project For College Assignment 2022-2023  -**

This project was made individually for my college assignment in my final year using Javascript as a programming language HTML and CSS for layout and styling on the front-end or Client side and PHP and MySql database for the back-end or server side

**Project During Full Stack Development Course 2023 -**

This project was done during my course from Udemy .The purpose of this project is to help a person to find the best places to visit during their holiday or some special occasion . this project made using NodeJs, Mongo DB , HTML5, CSS, Javascript ,Bootstrap.

**Project During Power BI Course 2025 -**

Designed and developed an interactive Sales Dashboard using Microsoft Power BI to visualize and analyze key sales performance metrics. Created custom KPIs (e.g., Total Sales, Profit Margin, Customer Growth) and extracted meaningful business insights for data-driven decision-making. Implemented DAX measures to calculate dynamic values such as Year-over-Year growth, Average Sales, and Regional Performance. Enabled cross-filtering, slicers, and drill-down features for better user interactivity and deeper insight exploration.

---

## Certificates-

- Full Stack Development - Udemy 2023
- Microsoft Power BI-  Udemy 2025
